

AMERICAN BOARD of OBESITY MEDICINE

American Board of Obesity Medicine Fellowship Pathway Background Information:

The American Board of Obesity Medicine allows qualified graduates of fellowship programs to apply to take the obesity medicine certification exam through a designated fellowship pathway. In order to meet the requirements of the fellowship pathway, applicants must submit proof of fellowship completion and a letter of attestation from their fellowship director supporting the application. Not all fellowship graduates will meet the requirement to receive a letter of attestation. In the event a fellowship graduate does not meet the threshold described below, they may seek certification through ABOM's CME pathway. By signing this letter, the fellowship director is personally attesting to the fact that the applicant meets the standard described. **Please complete and sign this attestation letter only if you have firsthand knowledge of the applicant's academic record and course of study/training.**

Fellowship Pathway Letter of Attestation (to be completed by Fellowship Program Director)

This letter serves as my attestation that

Dr. _____ (first and last name) completed a fellowship
in _____ (field of medicine) on _____ (date of completion)
at _____ (name of academic institution)
